Approved For Release 2006/05/24 : CIA-RDP70-00211R000900240052-8

B. Administration and Problems:

Records Management Section - We are continuing to assist the ORR Area Records officers in installing the new filing system. The files of the Assistant Director and the administrative staff have been combined and the installation will be completed next week. It is then planned to install the system in the Division administrative file and, in the process, adapt a manual to the specific requirements of ORR.

The Records Control Schedules for the Fiscal and Budget activities is in the final stages of completion. It is expected that a draft of the proposed Schedule will be submitted to the Comptroller for his approval next week.

Initial contacts have been made to obtain working level clearances on the file manual in order to have it issued through the Regulations Control Staff. Some suggestions were made but no particular delays are anticipated and the necessary clearances are expected to be given within the next week.

An office notice has been issued outlining the Records Management Program for the Office of Communications and designating [] as the Area Records officer.

25X1

25X1

[] has requested that we meet with him to discuss initial steps in installing his program and to help him prepare material to use in selling the program at a staff meeting.

Two orders for special and expensive file folders were forwarded to this office by the Logistics office for approval of the purchase. In neither case were we successful in persuading the users to change to the standard supplies although there appeared to be no good justification for the special items. Until the notice authorizing the standardization of such supplies is issued, we do not anticipate much success in the project.

Records Center Section - Requisitions are being prepared for the equipment needed to operate the new Records Center.

Mail Control Section -

1. There were no calls for the pick up or delivery of material to the homes of the Director or Deputy Director.
2. A check with [] of ORR on Friday, 15 May 1953, to determine the effect of the new mail delivery schedule on her Branch, revealed that it is highly satisfactory.
3. Representatives of the Office of I&S, - FI/RI, the Department of State and the U.S. Air Force Security Service, have been contacted regarding the use of rotary type locks on punch material. Use of these locks will eliminate to some extent the need for the courier to sign for each separate document. It appears that limited approval will be given but a memo outlining the present and proposed procedures will first be forwarded to the Office of I&S for their concurrence.
